The **Loren Cook** fan company  
announces a brand new product:

# TMX

 Tubular Mixed Flow

The Mixed-Flow wheel has become the industry standard for commercial inline applications: quieter, lower Brake HP, more energy efficient & smaller footprint when compared to tubular centrifugal or square inline fans.

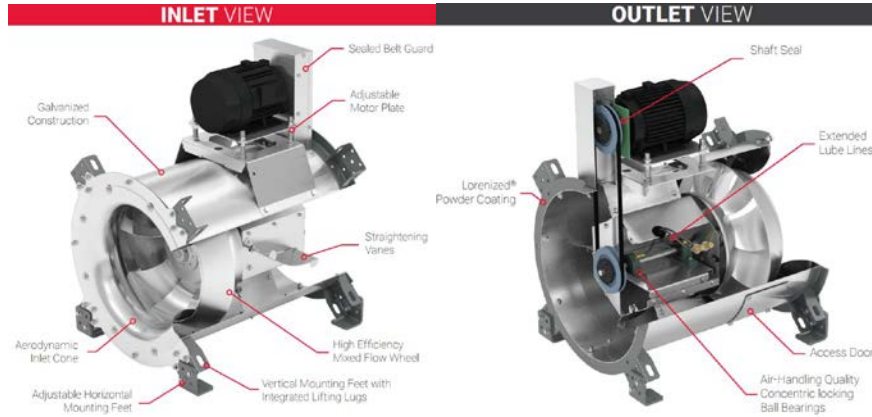

**But Mixed-Flows are bit pricey, aren't they? Not anymore!** Model TMX is designed for medium pressure, indoor applications. All the performance of the top-of-the-line QMX model, but at a lower cost.

Our offices/warehouse:

43 Thomas St.  
East Hartford, CT 06108  
(860) 290-6969  
Fax: (860) 290-6977  
[airequipmentllc.com](http://airequipmentllc.com)

**Cook's TMX mixed-flow fan is the perfect inline choice when the External Static Pressure is between 0.5" and 3.0" w.g.**

**And available in a wide array of colors!**

For more information about Loren Cook's new TMX inline fan, call the Air Equipment office at 860-290-6969 or send an email to Bill Dunn at: [bdunn@airequipmentllc.com](mailto:bdunn@airequipmentllc.com)
